

LYNX ACCENT

Form follows Façade

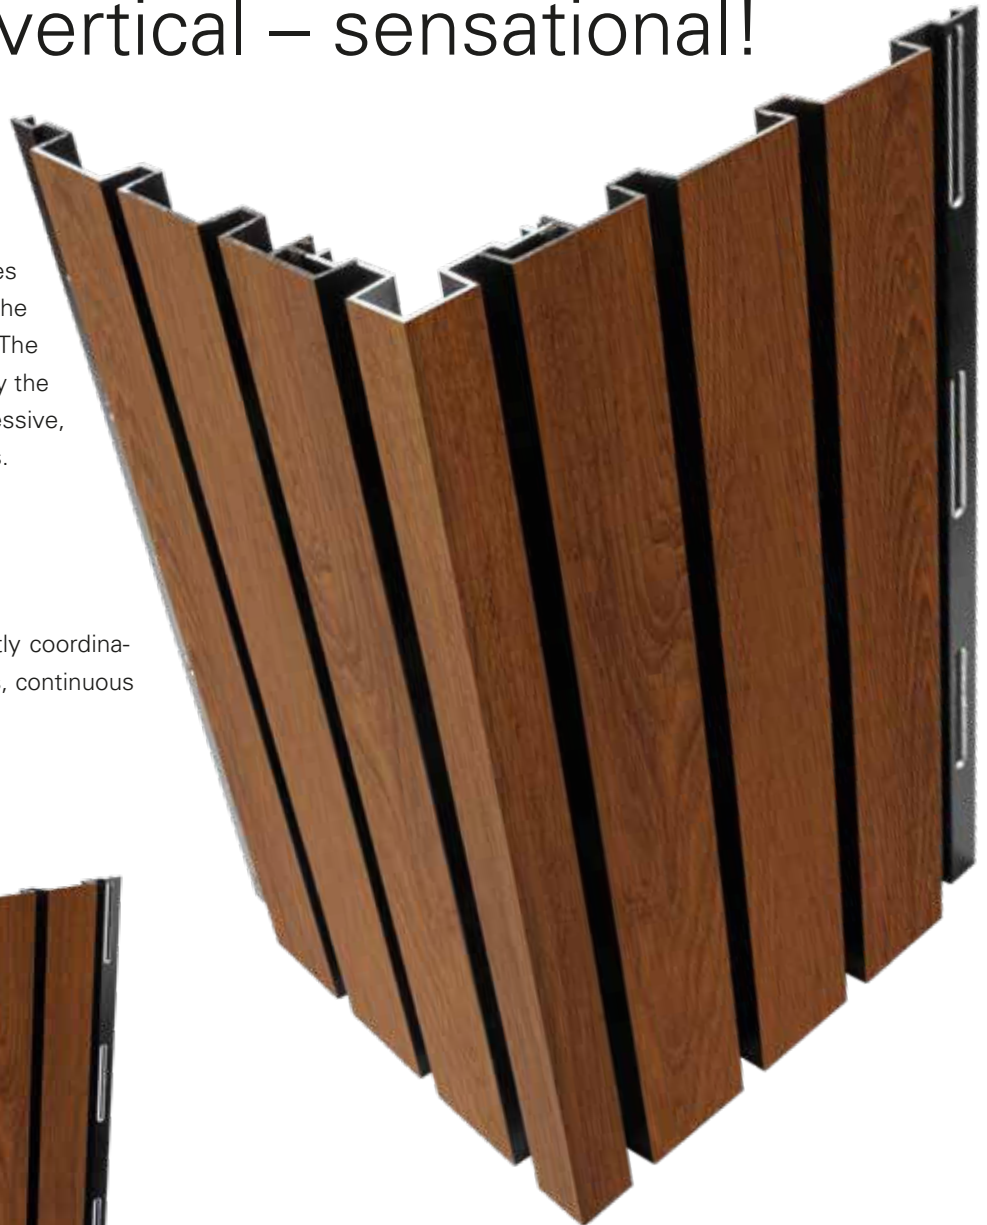

Horizontal – vertical – sensational!

Acoustic panel look for façades

The new LYNX Accent profile impresses with three fine, high-precision ribs of the same width as our 6" siding profile. The striking, elegant structure is enhanced by the black backed gaps and creates an expressive, profiled effect both indoors and outdoors.

Perfect corners for a continuous design

The system is rounded off by a perfectly coordinated corner profile that enables seamless, continuous cladding.

Available in Royal Oak and Ruby Pine

LYNX ACCENT

Precision Meets Distinctive Style

The new LYNX Accent profile features three fine ribs across the width of one of our classic siding panels. Its striking and elegant structure is enhanced by black recessed grooves, creating a bold, expressive surface – for interiors and façades alike.
